EDUCATION

The University of Melbourne

BSc, Computing and Software Systems

Achievements: 2 Computing Association Hackathon Wins (CISSA Scuffathon and CISSA Catalyst)

February 2023 – December 2025

Melbourne, VIC

EXPERIENCE

Software Engineer

Altech Data Solutions Pty Ltd

February 2025 – Present

Melbourne, VIC

- Developing an AI-powered accounting software tailored for an accounting firm to enhance workflow automation.
- Engineering a robust and scalable application using React, Flask, and PostgreSQL, integrated with AI/ML models.
- Implementing automated CI/CD pipelines on GCP to streamline development and deployment.

Software Developer

CV Wilmar Internusa Steel

November 2023 – December 2024

Makassar, Indonesia

- Automated removal of outdated shipments from MySQL using Django-Cron, reducing database clutter by 80%.
- Configured an administrative panel for bulk Excel imports, dynamically updating item availability across warehouses.
- Developed a product page for real-time item availability, reducing hundreds of monthly customer queries.
- Designed a shipment tracking system, empowering over 1,000 customers to easily check status of deliveries.

VOLUNTEERING

IT and External Relations Officer

Melbourne University Indonesian Students' Association

August 2023 – September 2024

Melbourne, VIC

- Created a Django registration portal, automating custom ticketing for 400+ university talk show sign-ups.
- Managed a \$15,000 budget for a talk show featuring government officials discussing key social, political, economic, and climate issues in Indonesia.
- Spearheaded fundraising initiatives, securing \$25,000 to support the renovation of an earthquake-affected school in Indonesia.

PROJECTS

TrackJam | Next, MySQL, JavaScript, Spotify API

- Built a web application that gamifies Spotify listening, turning daily music minutes into points for competition.
- Utilized Next.js and Spotify API to make a leaderboard where users can compete with, view last played tracks, and favourite songs.
- Led a cross-functional team of backend and frontend developers to execute core features.
- Awarded "Most Innovative" at the University of Melbourne's CISSA Hackathon.

QuizPlus | React, Node, Express, JavaScript, MySQL, JWT, OpenAI API

- Developed a dynamic quiz platform using React and Node that generates personalized feedback for students' maths solutions.
- Implemented JWT authentication for security and leveraged OpenAI API to provide AI-driven feedback.
- Integrated an interactive canvas for students to solve problems and teachers to upload step-by-step solutions.

TARA | Django, Python, HTML/CSS, JavaScript, MySQL

- Created a fully functional CRUD application for an Indonesian school using Django, allowing students to rate subject teachers.
- Implemented a user authentication and activation system leveraging Django's Email Service for auth tokens.
- Structured a normalized SQL database to store reviews, teachers and user information.

SKILLS

- Languages: Python, Java, JavaScript, TypeScript, C, SQL HTML, CSS.
- Software Development: React, Next, Node, Express, Django, Flask, PostgreSQL, MySQL.
- Tools: Git, Postman, Insomnia, Tailwind, Docker, GCP, AWS.
