EDUCATION

The University of Melbourne

BSc, Computing and Software Systems

Achievements: 4 Hackathon Category Wins (CISSA Scuffathon, CISSA Catalyst, and HackMelbourne Hackiethon)

February 2023 – December 2025

Melbourne, VIC

EXPERIENCE

Software Engineer

Altech Data Solutions Pty Ltd

April 2025 – Present

Melbourne, VIC

- Developing a modular, production-grade AI assistant system powered by local LLMs for an insurance client.
- Integrating LoRA-based parameter-efficient fine-tuning (PEFT) pipelines to specialize assistants for niche domains, reducing fine-tuning time by 65% and memory usage by 70%.
- Architecting the system to support easy model switching, multi-assistant management, plugin extensibility, and deployment readiness on custom GPU servers, cutting response time by 40%.

Software Engineer Intern

Altech Data Solutions Pty Ltd

February 2025 – April 2025

Melbourne, VIC

- Developed an AI-powered accounting software, cutting reconciliation time by 50% for an accounting firm client.
- Engineered an admin panel for an office rental platform using Next, Flask, JWT, and PostgreSQL, improving production performance by 40%.
- Implemented CI/CD pipelines on GCP, cutting deployment time by 60% and ensuring seamless updates.

Software Developer

CV Wilmar Internusa Steel

November 2023 – December 2024

Makassar, Indonesia

- Automated removal of outdated shipments from MySQL using Django-Cron, reducing database clutter by 80%.
- Developed a product page for real-time item availability, reducing hundreds of monthly customer queries.
- Designed a shipment tracking system, empowering over 1,000 customers to easily check status of deliveries.

VOLUNTEERING

IT Coordinator and Developer

Melbourne University Esports Association

February 2025 – Present

Melbourne, VIC

- Developed new Discord bot features, automating processes and enhancing community engagement.
- Maintained and optimized the club website using Next.js, improving user experience for over 800 members.

IT and External Relations Officer

Melbourne University Indonesian Students' Association

August 2023 – September 2024

Melbourne, VIC

- Created a Django registration portal, automating custom ticketing for 400+ university talk show sign-ups.
- Built an automated email system using Django to generate sponsorship requests, reducing outreach time from one month to a few hours.
- Managed a \$15,000 budget for a talk show featuring government officials discussing key social, political, economic, and climate issues in Indonesia.

PROJECTS

TrackJam | Next, MySQL, JavaScript, Spotify API

- Led a cross-functional team of backend and frontend developers to execute core features.
- Awarded "Most Innovative" at the University of Melbourne's CISSA Hackathon.
- Built a Next.js app using the Spotify API to gamify listening, converting daily minutes into competition points.

QuizPlus | React, Node, Express, JavaScript, MySQL, JWT, OpenAI API

- Developed a quiz platform that generates personalized feedback for students' maths solutions.
- Implemented JWT authentication for security and leveraged OpenAI API to provide AI-driven feedback.
- Integrated an interactive canvas for students to solve problems and teachers to upload step-by-step solutions.

TECHNICAL SKILLS

- Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL, HTML, CSS.
- Software Development: React, Next, Node, Express, Django, Flask, FastAPI, PostgreSQL, MySQL.
- Tools: Git, Postman, Insomnia, Tailwind, Docker, GCP, AWS.
